

I. Introduction: Atomic astrophysics and spectroscopy

II.

- 1.1 Chemical and physical properties of elements
- 1.2 Electromagnetic spectrum and observatories
- 1.3 Astrophysical and laboratory plasmas
- 1.4 Particle distributions
- 1.5 Quantum statistics

II. Atomic structure

- 2.1 The hydrogen atom
- 2.2 Quantum numbers and parity
- 2.3 Spectral lines and the Rydberg formula
- 2.4 Spectroscopic designation
- 2.5 The ground state of multi-electron systems
- 2.6 Empirical rules for electronic configurations
- 2.7 Intermediate coupling and $j-j$ coupling
- 2.8 Hund's rules
- 2.9 Rydberg formula with quantum defect
- 2.10 Multi-electron atomic systems
- 2.11 The Hartree–Fock method
- 2.12 Central-field approximation

III Interaction of one-electron atoms with electromagnetic radiation

- 3.1 The electromagnetic field and its interaction with charged particles
- 3.2 Transition rates
- 3.3 The dipole approximation
- 3.4 The Einstein coefficients
- 3.5 Selection rules and the spectrum of one-electron atoms
- 3.6 Line intensities and the lifetime of excited states
- 3.7 Line shape and width

IV Molecular Structure

- 4.1 The Born–Oppenheimer Approximation
- 4.2 Electronic Structure of Diatomics
 - 4.2.1 Labelling of electronic states
 - 4.2.2 Symmetry
 - 4.2.3 State labels
- 4.3 Schrödinger Equation
- 4.4 Fractionation
- 4.5 Vibration–Rotation Energy Levels
- 4.6 Temperature Effects
 - 4.6.1 Rotational state populations . .
 - 4.6.2 Vibrational state populations .
 - 4.6.3 Electronic state populations

V. Molecular Spectra

5.1 Selection Rules: Pure Rotational Transitions

5.1.1 Isotope effects

5.1.2 Rotational spectra of other molecules

5.1.3 Rotational spectra of molecular hydrogen

5.2 Vibrational Transitions

5.2.1 Structure of the spectrum

5.2.2 Isotope effects

5.2.3 Hydrogen molecule vibrational spectra

5.3 Electronic Transitions

5.3.1 Selection rules

5.3.2 Vibrational selection rules

5.3.3 Rotational selection rules

5.3.4 Transition frequencies

5.3.5 Astronomical spectra

5.4 Non- 1Σ Electronic States

5.5 Maser Emissions
